What is DEP

DEP is the decentralized platform for exchanging digital assets for any currency, which allows users to trade without intermediaries, guarantees fair deals and security due to the architecture of smart-contracts and API of payment systems, which combines mobility and crossplatforming.

Among other DEP services, we are going to create a bank, a DEP card with reward system that will be integrated in the application. All these services will be indispensable helpers of investors in the management and augmentation of crypto-finance. Each of the sections DEP will exist and interact with the application as a separate business environment and generate revenue from various types of digital services.

DEP OPERATION MECHANISM

There are several options for exchanging crypto currency for fiat money (and vice versa) through DEP: using an automatic payment system response integrated with the application and using the KYC procedure.

DEP BANK

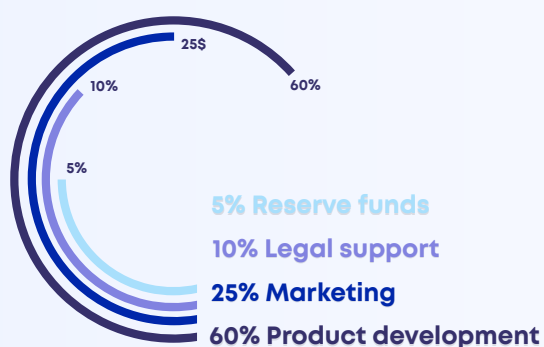

Own bank, which will pay reward and maintain the service. The bank will have the opportunity to buy and sell the cryptocurrency at a fixed price

DEP CARD

Prepaid card which gives you an opportunity to buy whatever you want wherever you want, with use of quick low-fees transaction from your crypto assets to cash. Just sell your crypto assets in DEP app and use your money.

Complete KYC procedure and card limits will be increased or stay anonymous – and use no more than 200 \$ per day.

INVESTMENT PLAN

TOKEN INFO

Token: **DEP** Token type: **ERC20** Number of tokens: **100.000.000 DEP**

How to buy tokens: **ETH**

ICO parameters:
Soft cap on ICO - 1.000.000\$
Hard cap on ICO - 8.650.000\$
